USI Pursuit CoE | June 2024

The Intelligence Update

Your monthly digest on the progress of Gen AI

Prompt for artwork: artificial intelligence concept; robot created with various shapes and colors

Hi all,

We are excited to announce the launch of 'The intelligence update' - a monthly newsletter designed specifically for the USI Pursuit colleagues.

What to expect:

The newsletter is set to navigate through the ever-evolving landscape of Generative AI, providing you with the latest industry updates, news, and inspiring stories of how our colleagues are leveraging the technology.

The newsletter will contain the following three sections:

Industry updates | Gen AI in Pursuits | Upcoming events

INDUSTRY UPDATES

Stay on the pulse of emerging trends, advancements, and breakthroughs in Generative AI.

A deep dive into how Generative AI will change the business landscape in the coming years

The cutting-edge technology, which is currently the focus of extensive investment and research is set to redefine the business ecosystem in unprecedented ways, signifying a new era of innovation and growth.

Click here for more details on how the rising influence of Gen AI is set to transform the business landscape.

Microsoft Build 2024 wrap up

The annual conference primarily focussed on how Microsoft's AI is helping developers streamline their work or create tools along with the announcement about a host of Copilot features coming to what is called Copilot+ PCs.
Click here to know more about the updates from the event.

Started in 2011, Microsoft Build is an annual conference event held by Microsoft, aimed at software engineers and web developers using Windows, Microsoft Azure and other Microsoft technologies.

ElevenLabs rolled out Text-to-Sound effects AI audio model

Elevenlabs, renowned for its artificial intelligence-powered voice generator, has now incorporated an AI-driven sound effects capability, enabling users to generate sound effects, brief musical compositions, soundscapes, and varying character voices by merely inputting text prompts.

'The Hardest Part' – Sora's first music video

Learn here about behind the scenes of creation of Washed Out's 'The Hardest Part' music video and the role that OpenAI's Sora played in the same.

GEN AI IN PURSUITS

Discover how your colleagues are harnessing the power of Generative AI in their projects.

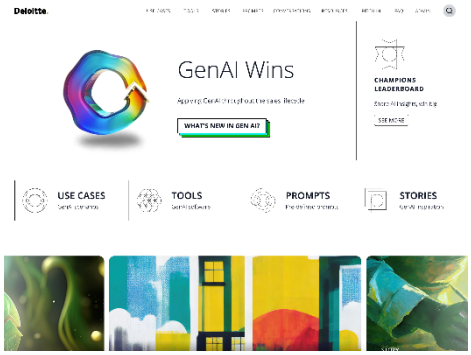

Let's read about how Skandh is leveraging Sidekick/Co-pilot:

- **Creating taglines for proposals—**Based on the win themes, client industry, specifics from the client's mission/vision statement, our relationship with them, and more, I was able to get some options from Sidekick.
- **Summarizing meeting notes—**My e-notes are equivalent to what one would call a scribble on a piece of paper. I use a lot of shorthand and generally have questions/statements and corresponding notes. Sidekick and Co-pilot are both good at summarizing notes based on how we prompt them to. In order to make the notes look more legible, I also prompt Sidekick to segment the notes into various categories like action items for the team, myself, a recap of the client history and so on.
- **Thank you note—**In an ongoing pursuit, SJI, the engagement team had to send "thank you" notes to the management whom they met last week. This is a defend pursuit and we have a lot of information available to us. I was able to prompt Sidekick and Co-pilot to generate 3 different kinds of these

notes – a brief note, a note with slightly more details about how PCAOB vs AICPA audits are different, and a detailed note with an example of how we have helped them in moving to private company audit last year along with an attachment detailing the differences between PCAOB and AICPA audit. As you might imagine, these required extensive prompts including highlighting win themes, key aspects of the discussion, what are the next steps, and trying to address any apprehensions SJI had about nimbleness or responsiveness. Subsequently, I toned down the formality in these notes and removed/replaced a few forbidden words like “collaboration”, etc.

Submit your GenAI stories, usecases, prompts, and G-Marks on the GenAI Wins website and stand a chance to win something cool!

UPCOMING EVENTS

Keep a tab on the significant Gen AI related events/ conferences both within and outside Deloitte for the upcoming month.

Deloitte/Adobe Firefly Monthly Office Hours (June 2024)

Thursday, 20 June 2024
9:30 PM to 10:30 PM

Adobe Express Bootcamp

June 2024 – check the sessions here for more details

We hope you enjoy reading the first edition.

If you have unique Gen AI stories to share or any feedback, please reach out to Aastha or Sateesh.

Please ensure you use GenAI responsibly and in line with the guidelines from US Office of Generative AI. Reach out to your team leads in case of any confusion on the usage.

Regards,
Aastha Boora
