USI Pursuit CoE | December 2024

Hi all,

We are thrilled to present the latest edition of 'The Intelligence Update' – your monthly update on everything related to Gen AI.

As you know, the newsletter will contain the following three sections:

Industry updates	Gen AI in Pursuits	Upcoming events

INDUSTRY UPDATES

Runway launches 'Expand Video' on Gen-3 Alpha Turbo

RunwayML, a video AI startup, has launched a new feature called **'Expand Video'**. This feature enables users to modify video aspect ratios by creating additional content around the original footage through the use of text prompts. Read more about the update here.

Meta unveils SAM2 – its new Open-Source Foundation Model for real-time object segmentation in videos and images

After introducing the Segment Anything Model (SAM) last year, a foundation AI model that simplified the process of segmentation by allowing users to segment images with a simple prompt, Meta has now taken a step further with SAM 2 - enhancing SAM's existing image segmentation capabilities and also extending it further to video processing. Click here to know more.

Following the launch of SAM2 by Meta, Researchers at the University of Washington have introduced SAMURAI, an advanced version of SAM2,

specifically designed for visual object tracking.
Read more here.

Vatican unveils AI services for St. Peter's Basilica ahead of Jubilee

The newly introduced Artificial Intelligence-enabled services for St. Peter's Basilica will provide virtual access to its Renaissance-era architectural treasures for everyone and offer enhanced tours for visitors. More details here.

GEN AI IN PURSUITS

Powering the proposal design with Firefly - Anindya

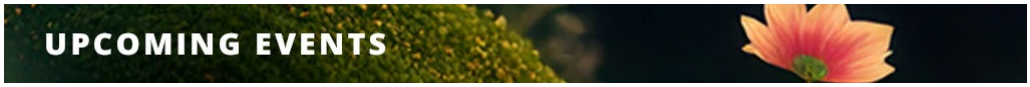

During a recent pursuit for providing tax services to a state university, I took to Adobe Firefly's text-to-image feature.
I explored oil painting as the art medium, to represent the rich culture and history of the state.

The university website provided information about visuals and traditions that surround the university, and aided by a native from the state (on the pursuit team), I was able to identify unique traditions and beliefs that led to stunning visuals from Firefly.

This led to the next exciting step, which was blending in the oil-painting-style visuals with similar backgrounds, and I used a tablet with oil brushes within Photoshop to achieve the desired look.
AI-generated images, combined with natural brush strokes helped create a very organic looking design that will resonate well with the client!

Submit your Gen AI stories, use cases, prompts, and G-Marks on the GenAI Wins website and stand a chance to win something cool!

Watch out for the following events/sessions for the month of December:

Creative Byte - Highlights from Adobe Max
Thursday, 05 Dec 2024 - 3:00 PM to 4:00 PM

We hope you enjoy reading this edition of the newsletter.

If you have unique Gen AI stories to share or any feedback, please reach out to Aastha, Mohan or Sateesh.

Please ensure you use GenAI responsibly and in line with the guidelines from US Office of Generative AI. Reach out to your team leads in case of any confusion on the usage.

Wishing you a wonderful holiday season and an amazing Delightful December!

Regards,
Mohan

INTERNAL USE ONLY

About Deloitte
Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited (DTTL), a UK private company limited by guarantee, its network of member firms, and their related entities. DTTL and its member firms are legally separate and independent entities. DTTL (also referred to as "Deloitte Global") does not provide services to clients. In the United States, Deloitte refers to one or more of the US member firms of DTTL, their related entities that operate using the "Deloitte" name in the United States, and their respective affiliates. Certain services may not be available to attest clients under the rules and regulations of public accounting. Please see www.deloitte.com/about to learn more about our global network of member firms.
