GEN AI IN PURSUITS

Leveraging Adobe firefly tools for a unique output - Anindya

"During a recent pursuit to provide tax services to a U.S. state, I used Firefly to create visuals. I crafted digital paintings depicting the state's unique scenarios and landscapes using Firefly's text-to-image function.

Researching the state's tourism website and Google images helped me generate accurate prompts. Firefly's 'Generative Fill' feature enhanced the visuals, and final touches were applied in Photoshop for uniform color-grading and retouching."
