OpenAI makes AI video generator Sora publicly available in US

OpenAI first presented Sora last February, but it was only accessible to select artists, film-makers and safety testers until last month when it was released publicly. Click here to know more.

Jetson Orin Nano Super by NVIDIA

More details about the most Affordable Generative AI Supercomputer here.

Utilizing Adobe Firefly tools to create a distinctive result - Tripti

Indurent is a UK based Blackstone (BX) portfolio company—a leading provider of industrial and logistics warehouses, serving over 2,000 customers from small businesses to large companies. They focus on offering high-quality spaces and are committed to sustainability and great customer service. While the proposal was led by the UK team, as BX pursuit liaisions, Rajat and I wanted to show that we understand and support their commitment to the environment. We used Gen-AI to redesign their warehouse buildings to be surrounded by greener, more eco-friendly surroundings. Firefly helped us make realistic and detailed images of their warehouses in greener settings. This made our proposal not only look good, but also match Indurent's values.

By using AI, we could tailor our design to fit Indurent's mission and show that we understand their goals. Beyond the design, our proposal reflected Indurent's commitment to building sustainable communities and supporting economic growth.

More from Pursuits – stories on Gen AI Wins

Hyper-personalisation of proposal using Adobe Firefly and Sidekick.
