5 ways to get the best art from Google's upcoming Flash 2.0 built-in image upgrade *here*.

The concerning ability of watermark removal *Link.*

Google introduces Gemma 3 *Link.*

GEN AI IN PURSUITS

Optimizing data extraction and summarization - USI Pursuit Research Team

Knowing your audience is key to any opportunity to build stronger connections and enable hyper-personalization of our messaging. The USI Pursuit Research Team assists the pursuit and engagement teams by providing biographic research on client leadership and board members.

In 2024, the team received nearly 80 requests and curated 700+ unique profiles, each requiring 2 to 2.5 hours of detailed research from various credible sources, including BoardEx, LinkedIn, and company websites.

The team leveraged the GenAI Studio tool to streamline this process, developing prompts to automate data extraction and summarization. By analyzing keywords and refining prompts through trials, the team created six specific prompts for sections such as Current & Past Experience, Board Affiliations, Education, Career Summary, Awards & Accolades, and Personal information.

Output example:

General

Current and Past Experience

- CEO/Managing Director, Mirvac, Nov 2012 - Feb 2023
- Regional Managing Director, LaSalle Investment Management, Mar 2010 - Nov 2012
