USI Pursuit CoE | June 2025

Hi all,

Welcome to the anniversary edition of 'The intelligence update' – a year of sharing insights and updates from the industry, stories from our colleagues and keeping you updated about the events within and outside Deloitte.

For the special edition, we asked our Pursuit colleagues to share their perspective and experiences with Gen AI over the last year – followed by industry updates and upcoming events.

Here is what they said:

"I've been leveraging AI tools like Sidekick and Co-pilot for note-taking, proofreading, messaging, consistency, bios, and client intel. This has helped me greatly enhance efficiency across pursuits."

Karan

"Over the past year, AI has become my creative jumpstart—helping me shape first-draft ideas into polished compelling storyboards. It's streamlined my design workflow, freeing up time for deeper thinking and strategic focus."

Richa

"I have been using Co-pilot and Sidekick for a while now. On one hand, Co-Pilot has helped me to focus and contribute more on the call, especially when there is a larger team, by capturing structured meeting notes and action items. On the other hand, Sidekick has been tremendously helpful in creating a base content for the pursuits and answering some of the non-traditional responses. Both tools have helped to save my time and focus more on my core work. "

Ayan

"Sidekick is my go-to for crafting punchy, engaging video scripts and executive summaries. It breaks down scenes, suggests witty dialogue, and keeps stories concise. For audit pursuits, Sidekick generates standout taglines tailored to client needs. I also use it to quickly summarize and simplify technical concepts. The process is fast, collaborative, and consistently delivers polished, client-ready content."

Archana

"Since joining Deloitte, I had my first hands-on experience with Adobe Firefly, which has significantly enhanced my ability to visualize and execute designs creatively, opening up numerous possibilities. In addition to Adobe Firefly, I leverage other generative AI tools such as Prompt with KX for proposal-related research. However, Sidekick has become my primary resource for quick prompts and expanding my knowledge. I particularly value the "Deloitte data" option in Sidekick, which enables me to deepen my understanding of Tax pursuits and research. "

Divya

"Sidekick has definitely made my life easier. Recently I used it to create a new step by step scope approach slide for content we didn't have anywhere. We just uploaded the RFP and gave a few prompts."

Ben

Updates from Google I/O 2025

Google, at its best during the annual developer conference, announced almost a hundred new updates, which are claimed to be the best and biggest gemini updates so far.

Here is the list of all the updates.

While we cant stop obsessing over the Veo 3 – the model where the video meets the audio, Google also shared a number of other updates for the creatives. Click here to know more about Google's new generative media models and tools.

Another interesting update is the evolution of Project Starline into a new 3D video communication platform: Google Beam. Read more here.

OpenAI acquires AI devices company founded by iPhone designer Jony Ive for $6.5 Billion

ChatGPT maker's biggest acquisition yet, the hardware startup is called io and was founded by Apple design guru Jony Ive, known best as one of the principal architects of the iPhone and a protégé of Steve Jobs. Link.
